

RESEARCH INTERESTS

My research focuses on human-centered intelligence and interaction in complex, dynamic environments. By studying the perception, understanding, and assessment of human behavior, alongside continual adaptation, I explore intelligent perception and adaptive interaction in integrated physical and virtual environments.

Drawing on computer vision, multi-modal learning, and extended reality, I investigate robust behavior perception under incomplete and unreliable observations, fine-grained action quality assessment, and continual learning and adaptation to changing tasks and environments. Through cross-modal information fusion, structured behavior modeling, and knowledge transfer, I aim to improve intelligent systems' detailed understanding of human behavior, reliable assessment, and long-term adaptability.

Building on this work, I am developing a human-centered intelligence framework for integrated physical and virtual environments that brings humans, robots, and autonomous agents into a unified interaction system, extending toward human–machine collaboration, embodied interaction, and autonomous adaptation.

WORK EXPERIENCE

 **Postdoctoral Researcher, Tsinghua University**
Department of Psychology and Cognitive Sciences
Collaborating Advisors: Prof. Jia Liu, Asst. Prof. Liyuan Wang
2025 – Present

EDUCATION

 **PhD, Beihang University, Beijing, China**
Computer Application Technology, State Key Lab of VR Technology and Systems
Advisor: Prof. Xiaohui Liang
2020 – 2025

 **Visiting Student, Durham University, Durham, UK**
Collaborating Advisors: Prof. Hubert P. H. Shum, Dr. Frederick W. B. Li
Feb. 2024 – Aug. 2024

 **Bachelor, Henan Normal University, Henan, China**
Major: Computer Science and Technology
Minor: English
2016 – 2020
2017 – 2020

 **Exchange Student, Frankfurt University of Applied Sciences, Frankfurt, Germany**
Collaborating Advisor: Prof. Jürgen Jung
June 2019

ACADEMIC ACTIVITIES AND SERVICES

➡ Received two postdoctoral research grants:

- China Postdoctoral Science Foundation General Program, 78th Batch (No. 2025M781489)

- National Funded Postdoctoral Researcher Program, Class C, 2026 (No. GZC20260911)

➡ Delivered oral presentations at several [top conferences in computer vision and virtual reality](#), including:

Conference	VR 2025	ECCV 2024	VR 2023	ISMAR 2023	ISMAR 2021
Report Link	v4Yz7dMdM3Q	Llyiw-CpOew	cZbc1ScexMg	D7DL85wP12w	DYrh6KpDKC

➡ Co-supervised multiple Master's and PhD students in China and UK, including:

Name (YY–YY)	Degree	University	Co-supervisor	Research Field
Ruisheng Han (24–28)	PhD	Durham	Prof. Hubert	Co-authored CVPRW
Ruizhi Cai (22–25)	Master's	Beihang	Prof. Liang	AQA, co-authored TVCG, IJCAI
Zikai Hao (22–25)	Master's	Beihang	Prof. Liang	Pose estimation, co-authored TVCG
Chen Chen (21–24)	Master's	Beihang	Prof. Liang	Hand-object interaction, co-authored ISMAR'23
Zhiyuan Cheng (20–22)	Master's	Beihang	Prof. Liang	Pose estimation, co-authored ISMAR'21
Yulei Zhong (20–22)	Master's	Beihang	Prof. Liang	Action recognition

➡ [Main student participant and contributor](#) in an NSFC project (No. 62272019);

➡ Responsible for the [reception and arrangement](#) of Dr. Frederick W. B. Li from Durham University during his visit to Beihang University (June 2023).

➡ Served as a [reviewer](#) for journals and conferences including TPAMI, IJCV, ICML, ICLR, CVPR, and others.

MAJOR HONORS AND AWARDS

2026.08	 Outstanding Doctoral Dissertation Award, Beijing Society of Image and Graphics (1 of 5 recipients)
2025.07	 Beijing Outstanding Graduate
2025.03	 No. 9 Company Special Scholarship, Beihang University
2024.11	 National Scholarship (PhD)
2024.06	 Beihang Academic Innovation Achievement Award
2020.12	 Henan Province Outstanding Bachelor's Thesis
2020.12	 National Second Prize, China Graduate Mathematical Modeling Competition
2019.11	 National Scholarship (Undergraduate)
2019.05	 Youth May Fourth Medal, Henan Normal University
2018.12	 National First Prize, China Undergraduate Mathematical Contest in Modeling
